# COMPETA

Competa is a new playout system written with community, hospital and internet radio in mind. The user interface has been designed to be easy to use for the novice, whilst still powerful enough for the more experienced user.

Competa also comes with Scheduler, which allows you to build rotations of songs, based on categories and genres of music, whilst observing daypart and artist and title rules. Scheduler can be set to run automatically, meaning **Competa** can run 24/7 unattended.

Audio is added to the library by simply being copied into an Import folder, Start, Intro and Next markers and other information can be added through the studio **Competa** screen or Scheduler.

Hardware :
Runs on Windows XP, Windows 7 SP1 and Windows 8 32 or 64bit.
Recommended minimum 1Ghz, 1Gb RAM.
Supports up to 4 separate soundcards.
Uses any Windows compatible soundcard
Requires Microsoft .net 3.5 and SQL Server Express 2005 or 2008.

Supported file formats:
WAV, MP3 and FLAC formats.
File tags from ID3, Cart Chunk and custom Competadata can be read.

Key Features :

☑ 4 Independent audio players. Each assignable to separate soundcards.
